Hector Johnson
Hiring Manager
StarTech Corp.
(987) 654-3210
hector@startechcorp.com

Dear Mr. Johnson,

As a full-time student at Columbia University, I've completed high-level courses in computer science, software development, Python, and machine learning with a GPA of 3.9. My technical acumen and passion for related innovation will allow me to excel in the intern position with your organization.

StarTech Corp.'s reputation as an innovator within the software industry is what draws me to apply for this internship. I can provide valuable contributions to the development of creative software solutions based on the following achievements from my academic career:

- Coordinated with a diverse team of students to develop facial recognition software, which included implementing features and writing scalable code
- Executed a machine learning project to predict potential stock prices for biotechnology companies during the pandemic
- Served as president of the university technology club, which included planning events and providing tutoring services to computer science and information technology students

I look forward to scheduling an interview with you to discuss further how my advanced knowledge of computer science would benefit StarTech Corp. You may contact me via phone or email at your convenience. I appreciate your time and consideration.

Sincerely,
