984 Morrison Boulevard, Columbus, OH 87764

Profile

Recent Bachelor of Engineering graduate with experience working with senior engineers to develop and test computer prototypes. Led a team of undergraduate engineers to identify, design and implement product improvements for national competition. Dedicated worker in team and individual settings, with strong problem-solving skills and an analytical mindset.

Key Skills & Proficiencies

- Algorithms
- Data structures
- Experienced in hardware testing processes
- Experienced SolidWorks user
- Product management
- Proven ability to problem-solve
- Strong interpersonal and communication skills

Education

Bachelor of Science in Engineering

St. Cloud State University, St. Cloud, MN September 2015 – June 2019

Course Completed:

- Computer Architecture and Design
- Laser Optics
- Mathematical Modeling
- Microcontroller System Design

Professional Experience

Computing Engineer Intern, Delta Computing, Columbus, OH

June 2019 – Present

- Assisted senior engineers to design and test new miniature computer prototypes
- Designed, tested and implemented new features to the existing software suite
- Kept daily records and communicated findings with project leads to assist in management of project

Help Desk Technician, St. Cloud State University, St. Cloud, MN

September 2016 – June 2019

- Troubleshoot and resolved technology problems
- Communicated clear steps to help students and faculty solve computing issues
- Provided networking and desktop support, account maintenance and printing assistance
