Profile

Experienced web and software developer with a history of design collaboration offers sophisticated coding and troubleshooting assistance. Project management and workflow management experience helps ensure your development projects come in on or before deadline and within budget every time.

Professional Experience

Web Developer, Lore Gaming, Sioux Falls, SD
January 2018-Present

- Develop system architecture to streamline bandwidth and help reduce downtime and lag for outside users
- Work with gaming designers to create interactive solutions to drive more engagement among users
- Oversee development work ticket and change management requests and help manage technical resources to meet prioritized needs

Junior Developer, Irene Vision Co., Canton, OH
September 2014 – December 2017

- Created data and system solutions that allowed customers to pull information with QR codes, substantially reducing backlog in call center
- Collaborated with designers and dev teams to design and implement simple interfaces that met business goals while reducing training requirements and opportunities for error in production
- Met all individual development plan milestones on each project

Education

Bachelor of Arts, Computer and Information Science
Ohio State University, Columbus, OH, September 2010 – May 2014

Skills
- Technical skills include Java, XML, HTML, MySQL and C++
