A Cyber Security Specialist with over eight years of experience delivering patient privacy software solutions for the healthcare industry. A proven track record of identifying system vulnerabilities and identifying innovative solutions to improve cyber security protocols, enhance data integrity, and prevent security breaches.

Professional Experience

IT Security Specialist

Oak Health Systems, Miami, FL | December 2017 – Present

- Manage the design, installation, operational planning, and risk remediation activities for more than 12 hospital clients valued at $200K-$500K, conduct risk assessments for clients and provide recommendations to enhance infrastructure and network security
- Perform ethical hacking, malware reverse engineering, and penetration testing to evaluate system vulnerabilities and develop defenses
- Deliver presentations to senior leadership, client stakeholders, and non-technical audiences on security risks, vulnerabilities, and improvement recommendations

Assistant Cyber Security Specialist

Apple Healthcare, Miami, FL | June 2015 – December 2017

- Developed hospital software in compliance with HIPAA Cyber Security Framework
- Coordinated with IT team to implement software solutions, test for vulnerability and report security issues and solutions to management team
- Provided technical manuals and training guides to ensure doctors, nurses and administrative staff could use software, ensuring a high level of user compliance
