A Journeyman Electrician with seven years of professional experience in repair, installation, and maintenance in both residential and industrial settings. A strong history of performing root-cause analysis and identifying innovative solutions to resolve major electrical issues and ensure compliance with OSHA safety standards.

PROFESSIONAL EXPERIENCE

JOURNEYMAN ELECTRICIAN

Economy Electrical, New York, NY | August 2019 – Present

- Assess costs and scope of electrical wiring, systems installations, and repairs for commercial and residential clients, secure precise measurements, identify technical solutions, and communicate complex electrical concepts to non-technical personnel
- Analyze blueprints, diagrams, and building codes and execute electrical projects in compliance with National Electrical Code (NEC) and OSHA safety regulations
- Provide mentorship to apprentice electricians to facilitate professional development

JOURNEYMAN ELECTRICIAN

Krasinski's and Sons Electric Services, New York, NY | June 2016 – August 2019

- Supported complex installations of electrical wiring and systems for residential clients, utilized ohm meters, IC testers, and dial indicators to obtain precise measurements and systems readings, and conducted safety inspections on electrical equipment
- Interpreted electrical schematics, blueprints, and building codes and coordinated with electricians to identify cost-effective solutions for customers

EDUCATION
