PROFILE

A recent graduate with a bachelor's degree in software engineering, specializing in Python, JavaScript, application development, and software development. Adept at creating scalable code to build high-quality software applications to support users and businesses.

PROFESSIONAL EXPERIENCE

Software Engineering Intern
StarTech Software Solutions Inc., Miami, FL | January 2023 – June 2023

- Performed testing and supported the development of features for mobile applications in React and Android environments under the supervision of software engineers
- Attended meetings with the project team to expand knowledge of application development, discuss potential new features, and evaluate user needs

ACADEMIC PROJECTS

Software Engineering Projects
Miami Dade College, Miami, FL | May 2021 – June 2023

- Designed and developed a mobile application to aid users in scheduling and monitoring appointments with real-time alerts, which included testing functionality, identifying bug fixes, and programming using Python
- Developed a fantasy football application using JavaScript to enable users to analyze and compare player statistics in real-time to determine scoring percentages and trade value
