Profile

Welder with a technical college degree in welding and six months of experience from two apprenticeships. Detail-oriented and enthusiastic welder who is interested in applying classroom learning to welding jobs on real-life construction sites and in welding shops. Has some experience in cutting, layout, pipe fitting, and blueprint reading.

Key Skills

- Embraces all welding safety practices, including wearing personal protective equipment and practicing safe techniques
- Knowledge of welding processes, such as oxy-fuel cutting and gas metal arc welding
- Familiar with welding blueprints, including special symbols, for a variety of types of projects
- Ability to plan and execute welding fabrication projects from start to finish by using layout, cutting, and welding techniques
