Dear Ms. Scott,

Writing 90% of the code for the most popular business solutions iOS app in 2020 won me the Developer of the Year award in my company. I hope to create the next must-have data warehousing software as Lead Software Developer at Addison Group.

As a seasoned developer with 12 years' experience and expert knowledge of the latest developments in business intelligence software, Addison Group's position as a market leader in the analytics industry appeals to me. My achievements in 2020 demonstrate my suitability to become an inspiring leader at your company. These include:

- Achieving average stability of less than 0.001% crashes for all applications developed
- Developing an error identification protocol that decreased negative app reviews by 78%
- Leading a large team of developers to create an analytics app that increased company revenue by 25%

I would like to schedule a meeting to demonstrate how my skills and experience can help Addison Group provide pioneering tools to its clients in 2021. I am available to attend an interview at your convenience.

Sincerely,

Maddison Brookes

P.S. Let me tell you why my work was featured in CODE Magazine in July 2020.
