Dear Mr. Hunter,

Three out of the four apps that I have personally developed have been rated 4.8 stars or above on both Google Play and AppStore. Developing apps and creating unique software has been a passion of mine since high school. I would like to bring that level of passion and creativity to the IT department at Cloud Clearwater.

I see that Cloud Clearwater is planning on bringing out a number of apps in the coming years to improve the customer experience for their clients, and I believe that I could be an asset to the development team. As someone who has just recently qualified with a master's in computer science, I can develop software and apps in all the latest programming languages.

Here are a few of my accomplishments:

- The youngest person to be accepted to the CalTech Computer Science graduate program in 2018
- Developed an award-winning home security app that uses a Raspberry Pi

I would like the opportunity to discuss my development skills and how they may benefit Cloud Clearwater.

Kind regards,

Micheal Johnson

P.S. I would love to tell you about my planned doctoral thesis.
