John Paul Mirren
Supervising IT Specialist
Dragonware, Inc.
(614) 409-1982
jp_mirren@dragonware.com

Dear Mr. Mirren,

With my excellent academic record and six months of practical experience in business IT, I believe I would be a recommendable Junior Programmer for your company. I graduated from Demison University with a degree in Computer Science, Major in Systems Analysis, and I have a strong knowledge of several programming languages, including C, C++, Arduino, Python, Visual basic and LTSpice.

My recent internship at BetaLink Technologies in Newark, Ohio, provided me with the well-rounded background needed for the position. As a fast learner and efficient team player, I was able to achieve the following:

- Consistent well-performing intern providing technical support for business clients
- Special recognition by the Demison University Research Foundation for our team's AI research project under the university's Summer Scholars Program
- Dean's Lister with a final GPA of 3.64

I hope to utilize my skills and qualifications in helping Dragonware maintain a strong global presence in the technology field. I would love to tell you more about my hard-earned accomplishments and technical knowledge through a job interview. Please feel free to contact me to set up an appointment.

Sincerely,

Zafra Keppel

P.S. — I'd love to demonstrate my programming skills and share some of the mobile app projects I created during my senior year.
