Casey Shawns
Hiring Manager
Cypress Resources, Inc.
(202) 999-0000
jobs@cypressresources.net

Dear Ms. Shawns,

My first data entry job opened up the world of pattern recognition and relational mathematics that inspired my path to a career in big data. Your advertised opening is the ideal opportunity for me to contribute my recent education and insight to Cypress Resources as a Data Analyst.

While pursuing my Master of Science in Data Analytics at George Washington University, I acquired the techniques to gather, analyze and manage massive, complex datasets. I learned how to interpret my findings and convey them in a professional, yet down-to-earth manner that numerically challenged associates can grasp. My accomplishments include:

- **Innovation:** As an intern, I created a prediction model resulting in improved cash flow cycles for the company.
- **Collaboration:** I participated in a student-led team project to build a more intuitive, aesthetically pleasing interface for an accounting firm.
- **Academics:** My 3.75 GPA helped me win the Big Data Science & Analytics Bi-Annual Scholarship during my last year of study.

I am eager to take the next step with you to explore how Cypress Resources can benefit from my hard work ethic, strong communications skills and professionalism in the Data Analyst position. Please contact me to set up an interview at your earliest convenience.

Regards,

Kalema Ojurabesa

P.S. – I'd love to share my experience with the 2019 Kaggle Machine Learning & Data Science Survey competition.
