Chandra McKnight
Senior Admissions Officer
Keiser University
(543) 210-9876
c.mcknight@youreemail.com

Dear Ms. McKnight,

In my senior year at high school, I received the highest overall score for the Human Physiology elective course. My teachers cited my outstanding knowledge of biology and well-developed reasoning skills as the reasons for awarding this mark. I hope to demonstrate the same drive and scientific aptitude as a nursing student at Keiser University.

As an ambitious and caring aspiring nurse, Keiser University's reputation for providing high-quality clinical instruction and practical opportunities appeals to me. I believe that the following achievements demonstrate that I have the ability and potential to succeed:

- Consistently scoring in the top 5% of my high school cohort for science and math
- Raising more than \$10k to support a local drug education program through community activities
- Volunteering weekly at an elementary school and delivering workshops on healthy eating to over 30 students

I would like to schedule an interview to discuss how my personal qualities and academic achievements can make me an asset to Keiser University's nursing program in 2021. Please get in touch to suggest a suitable time.

Sincerely,

Tiffany Osbourne

P.S. I would love to explain why my peers voted for me to represent them on the school council in 2020.
