Trained computer engineer with extensive experience in network, server, and security protocols. Thorough understanding of hardware and software and how they can affect local, campus, and wide area network productivity. Provided remote support for staff and students and collaborated with several technical teams to improve network functionality.

Key Skills

- CompTIA Network+, August 2017
- Work extensively with TCP/IP, IPX/SPX, Ethernet (10/100/1000) and NetBIOS technologies
- Windows Active Directory, Linux, and Novell Netware
- Cisco Certified Network Professional (CCNP), July 2018

Professional Experience
