Driven and resourceful recent university graduate with an education in computer science from the University of Washington. Excellent understanding of frontend and backend programming languages and technology stacks. Completed an internship with a tech start-up, demonstrating creativity and analytical skills while completing development, testing, and debugging tasks. Worked with teams to design API and web architecture. Evidenced mastery of computer science and math skills while tutoring undergraduate students.

## Key Skills

- HTML and CSS
- Backend and frontend programming languages
- Database and web storage
- Web architecture
- API design
- Testing and debugging
