**JOSHUA SWARTZ**

Hiring Manager  
Green Space Tech  
(432) 983-1298  
joshua@greenspace.com

Dear Mr. Swartz,

In my most recent role, I was responsible for the development and entire life cycle of web applications and product features, optimizing user experience and leading to an increased revenue of 35% over two years. My expertise in e-commerce web development and my motivated work style enabled me to accomplish these results. I hope to bring the same success to the team at Green Space Tech as a Web Developer.

With over seven years of experience in web development, I believe that my technical abilities would be a great match for Green Space Tech's reputation for innovative solutions. My previous achievements include:

- Analyzed customer traffic results and optimized web flow and architecture, leading to a 40% decrease in cart abandonment rate and generating 30% more sales
- Led a team of five web developers to design and implement web applications for e-commerce clients
- Developed and launched over 30 new features per year, resulting in client satisfaction of 97%

I look forward to the opportunity to contribute my skills to Green Space Tech. Please feel free to contact me with a date and time for an interview.

Sincerely,

*(Insert Signature Here)*

**SANDRA JAMESON**

P.S. I'd love to tell you how I won my company's annual coding competition!
