Dear Mr. Smith,

Improving a speech recognition program that reduced mobile banking time by 34%, was one of my top accomplishments as a senior computer scientist at Moneco Credit Union. Understanding the inner workings of Python and JavaScript helped me to ensure an optimal customer experience. I believe similar results could occur at Tekona Bank if I were your new senior computer scientist.

Tekona Bank is known for its end-user security programs making each transaction a secure one. For more than eight years, I led a 15 member development team that implemented extensive risk assessments, performance, and Agile testing. Some of my recent accomplishments include:

- Leadership: Led the execution of a return system that incorporated Explainable AI that adhered to a production deadline of 30 days
- Preparation: Upgraded security software on 260 servers for improved remote access
- Coordination: Trained staff on Logstash to reduce overall error rate by 38%

I look forward to discussing how my development, analytical, and testing skills would benefit your company. Please feel free to contact me at your convenience to schedule an interview.

Best regards,

Jeremy Swartz

P.S. — It would be great to tell you how my recent nomination for the NAFCU Innovation Award changed mobile accessibility at my credit union.
