[month, day, year]

Dear Ms. Westfield:

I would like to apply for the application developer position with Goji Labs. During my time as a programmer with Elm Apps Inc., I supported the development of gaming apps, performed quality assurance testing, and enhanced user functionality, leading to a 19% increase in revenue. I believe my knowledge of front-end and back-end development would be an asset to your team.

Goji Lab's reputation as an award-winning developer of mobile applications draws me to apply for this opportunity. Over my four years of experience in computer science, I've had the opportunity to deliver digital solutions to both startups and corporate clients. I am confident my passion for application development could benefit your organization based on my previous achievements:

- Created informational and gaming applications in Python for corporate and start-up clients, which increased name recognition among target audiences
- Developed mobile gaming apps, performed quality assurance testing, configured in-app purchases, and refined user functionality, which contributed to a 19% increase in revenue
- Coordinated with a team of user experience (UX) designers to enhance user interfaces (UI), UX copy, and application design, resulting in a 10% increase in user satisfaction

I would like to schedule an interview to further discuss how my expertise in full-stack development could be an asset to Goji Labs. Feel free to contact me via phone or email at your convenience. Thank you for your time and consideration.

Best regards,

Jack Simon
