Dear Ms. Richardsen,

I would like to apply for the information technology (IT) security director position with Tontaek that I found on LinkedIn. During my time as a cybersecurity manager at Oak Health Systems, I developed and implemented a new security audit program. My efforts improved the mean time to detect (MTTD) and mean time to respond (MTTR) by over 10%. I believe I can achieve similar results for your organization in a director-level role.

Tonatek's development of artificial intelligence (AI) encryption technology is what I consider the future of cybersecurity. With over 14 years of experience within this space, I see the value in using machine learning and AI to bolster security capabilities. I'm confident my background aligns perfectly with your goals based on my career achievements:

- Managed the design, installation, operational planning, and risk remediation activities for more than 12 hospital clients valued at up to \$400,000, conducted risk assessments, and provided recommendations to enhance infrastructure and network security
- Developed hospital software in compliance with HIPAA Cyber Security Framework and designed the user and entity behavior analytics (UEBA) auditing program for 5,000 global staff members
- Delivered presentations to senior leadership, client stakeholders, and non-technical audiences on security risks, vulnerabilities, and improvement recommendations

I would like to schedule an interview to provide more insights into how my knowledge of AI cybersecurity could support Tonatek's long-term goals. You may contact me via phone or email at your convenience. I appreciate your time and consideration.

Sincerely,

Aliya Jackson
