## Professional Experience

### IT Project Manager

Solaris Group Inc., Newark, DE | April 2018 - Present

- Manage 15+ technical projects for a technology solutions company, oversee cross-functional teams of up to 10 personnel, develop project roadmaps, manage project budgets of over \$500K, and ensure alignment with business requirements.
- Drive initiatives to automate manual processes for data management to reduce work hours by 40 per week and save the company over 80K per year.
- Lead daily standups with project teams and attend meetings with senior leadership and client stakeholders to review project status updates and milestones.
- Serve as the point of contact for client stakeholders throughout the project lifecycle, analyze business needs, and identify solutions to project roadblocks.

### IT Project Coordinator

Technology Innovation Group, Newark, DE | June 2016 - April 2018

- Coordinated with the IT Project Manager to execute technical projects, collaborated with QA, engineering, and project teams, conducted project planning, and provided support for the build-out of scalable IT infrastructure.
- Attended daily project meetings, created reports on project milestones and roadblocks, and identified solutions to ensure on-time and on-budget delivery.
- Collaborated with the engineering organization to streamline project reporting efforts and eliminate manual data entry, which saved over eight work hours per week.

### IT Network Engineer

Software Diagnostics Corp., Wilmington, DE | May 2015 - June 2016

- Supported network infrastructure projects, troubleshoot technical issues, performed hardware and system maintenance, and collaborated with the network engineering team to drive continuous improvement.
