PROFILE

A labor and delivery nurse with entry-level experience specializing in antepartum care, patient relations, clinical operations, and relationship building. A proven track record of delivering compassionate care to patients during labor and postpartum.

PROFESSIONAL EXPERIENCE

Labor and Delivery Nurse

Boston Medical Center, Boston, MA | May 2021 – Present

- Delivered empathetic nursing care to patients during labor, antepartum, and postpartum and provided support for newborn care
- Monitored patients following C-section operations, including blood pressure, vital signs, and reactions to anesthesia
- Conduct interviews with patients to obtain medical history, allergies, cognitive disorders, and conditions to identify appropriate treatment methods
- Coordinate with nursing teams, physicians, patients, and families to provide treatment based on emotional, cultural, and physical needs

Nurse Extern

Massachusetts General Hospital, Boston, MA | March 2021 – May 2021

- Coordinated with registered nurses to provide compassionate nursing care, which included evaluating patient symptoms and coordinating with multidisciplinary teams to determine appropriate treatment based on health conditions
- Administered medications and monitored vital signs under the direction of physicians and licensed nurse practitioners
