An Instructional Designer with 10+ years of experience specializing in curriculum development, eLearning, and content strategy. A strong history of collaborating with cross-functional teams to build innovative learning solutions. Adept at using learning technology, universal design principles, and blended approaches to design programs for target audiences.

## PROFESSIONAL EXPERIENCE

### Instructional Designer

Healthcare Learning Center, Boston, MA | October 2016 – Present

- Manage, develop, and implement training curriculum and resources for medical education programs, including content strategy, course design, and eLearning modules
- Coordinate with subject matter experts to integrate universal design principles across all courses and learning formats and ensure the accessibility of educational materials across diverse student populations, resulting in a 30% increase in student engagement
- Oversee the transition to eLearning classrooms and digital curriculums during Covid-19 to retain existing students and ensure the continued delivery of high-quality medical training

### Instructional Design Consultant

Med Education Consulting, Boston, MA | May 2011– October 2016

- Provided consulting services to clients as a subject matter expert in curriculum development and instructional design, which included delivering recommendations for product development, quality assurance, and student engagement
- Identified learning needs for organizations, which included identifying opportunities to improve training programs and learning materials for diverse student populations
