

Professional Experience

Senior Biological Technician

Light Source Medical Labs, San Diego, CA | October 2019 – Present

- Lead the planning, development, and execution of PCR testing and laboratory experiments to determine the efficacy of existing vaccines on new Covid-19 strains
- Manage a team of 10+ biological technicians, delegate project responsibilities, evaluate performance, build a work culture founded on collaboration and accountability, and provide coaching and mentorship to junior lab technicians to drive professional growth
- Coordinate with laboratory personnel and multidisciplinary teams to enhance the reliability of lab data and results by developing new analytical techniques

Biological Technician

Altair Laboratories, San Diego, CA | May 2018 – October 2019

- Supported research efforts and experiments in biological laboratory and greenhouse environments, gathered samples and biological materials, and analyzed specimens
- Managed inventory of laboratory equipment, instruments, and materials, including specimens, samples, reagents, microscopes, and storage containers

Education

Bachelor of Science (B.S.) Biology

University of San Diego, San Diego, CA | September 2014 - May 2018

Raheem Richardson
