A Software Engineer with five years of experience specializing in software development, machine learning, artificial intelligence, and Python. A proven track record of collaborating with dynamic software engineering teams to execute large-scale deployments.

PROFESSIONAL EXPERIENCE

SOFTWARE ENGINEER

Arcline Technologies, New York, NY | May 2019 – Present

- Lead the design, testing, and deployment of software solutions for enterprise customers, manage project priorities using Agile methodologies, and utilize data analytics to drive feature development and deliver value-added services
- Identify opportunities to automate manual data entry and monitoring by integrating new tools and leveraging knowledge of machine learning and data science
- Provide innovation coding in Python for software development projects and coordinate with team members to maximize scalability of code and software frameworks

SOFTWARE ENGINEER

Ascension Tech Consultants, New York, NY | May 2017 – May 2019

- Supported the development and delivery of integrated software solutions, performed code reviews to aid team members, and provided coaching and mentorship
- Deliver technical consulting to client businesses, identify infrastructure needs, and coordinate with software engineers to develop ideal software solutions
