PROFESSIONAL EXPERIENCE

ASSEMBLER / QUALITY CONTROL TECHNICIAN

Ford Motor Company, San Diego, CA
October 2017 to Present

- Build high-quality components by examining connections for proper fit and securing parts and subassemblies
- Fit and modify components based on close review of blueprints and schematics
- Fix assembly issues by modifying dimensions to match
- Regularly inspect production areas for correct product forms, specs, storage, packaging, labeling, and coding

Highlights:

- Exceeded daily production quota by more than 10%, earning "Employee of the Month" on five occasions
- Proposed several process updates that made daily operations more streamlined and quality-focused
- Recently appointed to take on additional quality control duties and co-develop a new quality standards manual
