Professional Experience

Biomedical Engineer

Detroit Medical Center, Detroit, MI | May 2019 – Present

- Deliver technical support for medical equipment for a high volume hospital with a 6:1 patient ratio, including EKGs, surgical devices, dopplers, and dialysis machines
- Implement a new preventative maintenance schedule to prevent risk of equipment failure, improve operational efficiency, and enhance patient flow by 5%
- Provide training to 20+ nurses and medical staff on equipment usage and troubleshooting

Biomedical Engineer

Mercy Hospital, Detroit, MI | October 2017– May 2019

- Executed complex technical implementations for large hospitals, ensured safe and optimal functioning of biomedical devices, and achieved a 94% client satisfaction rate
- Reduced equipment downtime by 15% by providing remedial training to hospital personnel and implementing preventative maintenance procedures

Education

Bachelor of Science (B.S.)
Biomedical Engineering
University of Michigan, Ann Arbor, MI
September 2013 - May 2017

Key Skills

- Biomedical Equipment
- Technical Support
- Preventative Maintenance
- Process Improvement
- Medical Device Safety

Certifications

- Biomedical Equipment Technician Certification (CBET), May 2017
